The City of Santa Ana Completes CIS Implementation of Systems & Software's enQuesta Solution

Santa Ana, CA and Williston, VT, March 30, 2009 – Harris Computer Systems (Harris), a subsidiary of Constellation Software Inc. (TSX: CSU) is pleased to announce that the City of Santa Ana, CA (City) has implemented Systems & Software's (S&S) enQuesta 3e solution to assist in providing an integrated approach to managing and optimizing its customer service operation.

Santa Ana, the County Seat of Orange County and the 9th largest city in California, was in search of an enterprise resource planning system (ERP). After a lengthy evaluation process, Santa Ana chose a best-of-breed approach and selected S&S to provide the utility billing and customer information system (CIS) portion of the project. With the CIS now in place, the first phase of the City's ERP project is complete. The City is now delivering customer information and water, refuse, sewer, and paramedic subscription billing services to its more than 350,000 residents using enQuesta.

S&S successfully implemented their core enQuesta CIS solution as well as their customer self-service module, enQuesta WebConnect. Customers are able to view their account and consumption information online. Dave Decker, General Manager at S&S notes, "We are very excited to have the City of Santa Ana live on enQuesta. To ensure a smooth implementation and go-live success, we focused on using our prior implementation experience, a quality staff and standard processes."

Christine Duarte, Treasury Manager at the City comments, "Thanks to the combined efforts of our Municipal Utility Services section, our IS team and the hard work of S&S, we have experienced a successful implementation."

The City of Santa Ana is S&S's fifth Southern California customer live on enQuesta.

About Systems & Software, Inc.

Since 1973, Systems & Software has been a top-rated CIS provider to municipal and investor-owned (IOU) electric, water and gas utilities. With an unrivalled track record of success, the company's web-based enQuesta software drives advanced business performance including utility billing, revenue management, mobile workforce management, GIS integration, electronic bill presentment & payment (EBPP), automated meter integration (AMI/MDM), time-of-use (TOU) billing, asset management/work management integration, customer self-service web portal, business intelligence and reporting. Based on service-oriented architecture (SOA), enQuesta is specifically designed for utilities and is proven to increase efficiencies and revenues, as well as enhance customer service. For more information about Systems & Software, and enQuesta, please visit www.ssivt.com.
