Systems & Software Announces the Release of enQuesta⁴

Williston, VT, May 11, 2009 – Harris Computer Systems (Harris), a subsidiary of Constellation Software Inc. (TSX: CSU) is pleased to announce that Systems & Software (S&S), a wholly owned subsidiary of Harris, will be unveiling enQuesta 4 at CS Week, Wednesday, May 20th.

enQuesta 4 is an evolution of solution, integration, and partnership. With the advent of smart metering, the continuous evolution of our industry is being further compressed and utilities are seeking progressive and affordable solutions to meet their needs. The enQuesta 4 **solution** offers utilities the ability to proactively select the individual components that are critical to their organization's success along their meter-to-cash value chain. While one organization's long-term success requires a utility billing, customer self-service, and MDM solution, another may require an ERP and a paperless environment using enQuesta 4's Mobile Field Management and Document Management module. enQuesta 4 offers you these options plus many more while keeping the concept of 'Vermont Green' woven within each module.

Integration encompasses not only technology advances but it also speaks to our 'personnel toolbox.' enQuesta 4 is built on an open source platform and will easily fit into your technology infrastructure. To promote integration throughout your utility, we include an array of web services, an administrator's toolkit, and enhanced reporting. The most valuable asset we deliver is our people and their proven experience implementing the solution that will ultimately be "enQuesta 4 you."

Finally, the enhanced functionality that exists within enQuesta 4 was born from within our customer base – the **partnerships** that exist from over 35 years of serving the utility industry. In large part, the functionality that is now enQuesta 4 has come from our customer user group meetings, our annual user forum, and endless feedback from our customer base through our Support Desk. As a member of the enQuesta 4 family, you will have a direct impact on the future of your solution and protection of your investment for years to come.

Stop by booth #601 during CS Week, at noon on Wednesday, May 20th, to view the unveiling of enQuesta 4 and begin the process of creating your own enQuesta 4 success story.

About Systems & Software, Inc.

Since 1973, Systems & Software has been a top-rated CIS provider to municipal and investor-owned (IOU) electric, water and gas utilities. With an unrivalled track record of success, the company's web-based enQuesta software drives advanced business performance including utility billing, revenue management, mobile workforce management, GIS integration, electronic bill presentment & payment (EBPP), automated meter integration (AMI/MDM), time-of-use (TOU) billing, asset management/work management integration, customer self-service web portal, business intelligence and reporting. Based on service-oriented architecture (SOA), enQuesta is specifically designed for utilities and is proven to increase efficiencies and revenues, as well as enhance customer service.
