Systems & Software's enQuesta 4 Momentum Continues at SEMCO Energy

Williston, VT, February 1, 2011 – Harris Computer Systems (Harris), a subsidiary of Constellation Software Inc. (TSX: CSU) is pleased to announce that SEMCO ENERGY Gas Company, a division of SEMCO Energy, Inc. (SEMCO) has completed an agreement with Systems & Software (S&S), a wholly-owned subsidiary of Harris, to upgrade to its enQuesta 4 solution.

SEMCO (Port Huron, MI) went live with their original implementation of enQuesta in October, 2006. Since that time, SEMCO has proven to be a key strategic customer for S&S. "SEMCO constantly forces us to push the envelope both functionally and technically. They challenge us to exceed their expectations and drive a high degree of our development efforts specifically in the areas of Credit & Collections and integration with other support systems," comments Raja Mukherjee, General Manager, Systems & Software.

SEMCO has elected to upgrade to enQuesta 4 for the technological advances they will now be able to take advantage of and as well for the functional enhancements surrounding work queue automation. "We are always looking for ways we can be more efficient from an operational standpoint. We like the additional configurability enQuesta 4 will give us as our business requirements are constantly changing," comments Laurie Owens, Director of Customer Service.

Systems & Software looks forward to bringing the same success to SEMCO as they have to the other customers who have already created their own enQuesta 4 success story!

About SEMCO Energy, Inc.

SEMCO Energy, Inc. (NYSE:SEN) distributes natural gas to more than 392,000 customers combined in Michigan, as SEMCO ENERGY Gas Company, and in Alaska as ENSTAR Natural Gas Company. It also owns and operates businesses involved in propane distribution, intrastate pipelines and natural gas storage in various regions of the United States.

About Systems & Software, Inc.

Since 1973, Systems & Software has been a top-rated CIS provider to municipal and investor-owned (IOU) water, electric and gas utilities. With an unrivalled track record of success, the company's web-based enQuesta software drives advanced business performance including utility billing, revenue management, mobile workforce management, GIS integration, electronic bill presentment & payment (EBPP), automated meter integration (AMI/MDM), time-of-use (TOU) billing, asset management/work management integration, customer self-service web portal, business intelligence and reporting. Based on service-oriented architecture (SOA), enQuesta is specifically designed for utilities and is proven to increase efficiencies and revenues, as well as enhance customer service.
